_template/src/modules/uORB
/Publication.hpp

```
graph BT; A["/home/andressanchez  
/Escritorio/GIT/project  
_template/src/modules/hello  
/hello.cpp"] --> C["/home/andressanchez  
/Escritorio/GIT/project  
_template/src/modules/uORB  
/Publication.hpp"]; B["/home/andressanchez  
/Escritorio/GIT/project  
_template/src/modules/uORB  
/PublicationMulti.hpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a grey box representing a header file: `/home/andressanchez/Escritorio/GIT/project_template/src/modules/uORB/Publication.hpp`. Below it are two white boxes representing source files. The left box is `/home/andressanchez/Escritorio/GIT/project_template/src/modules/hello/hello.cpp` and the right box is `/home/andressanchez/Escritorio/GIT/project_template/src/modules/uORB/PublicationMulti.hpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

/home/andressanchez
